Department of Electronics Engineering

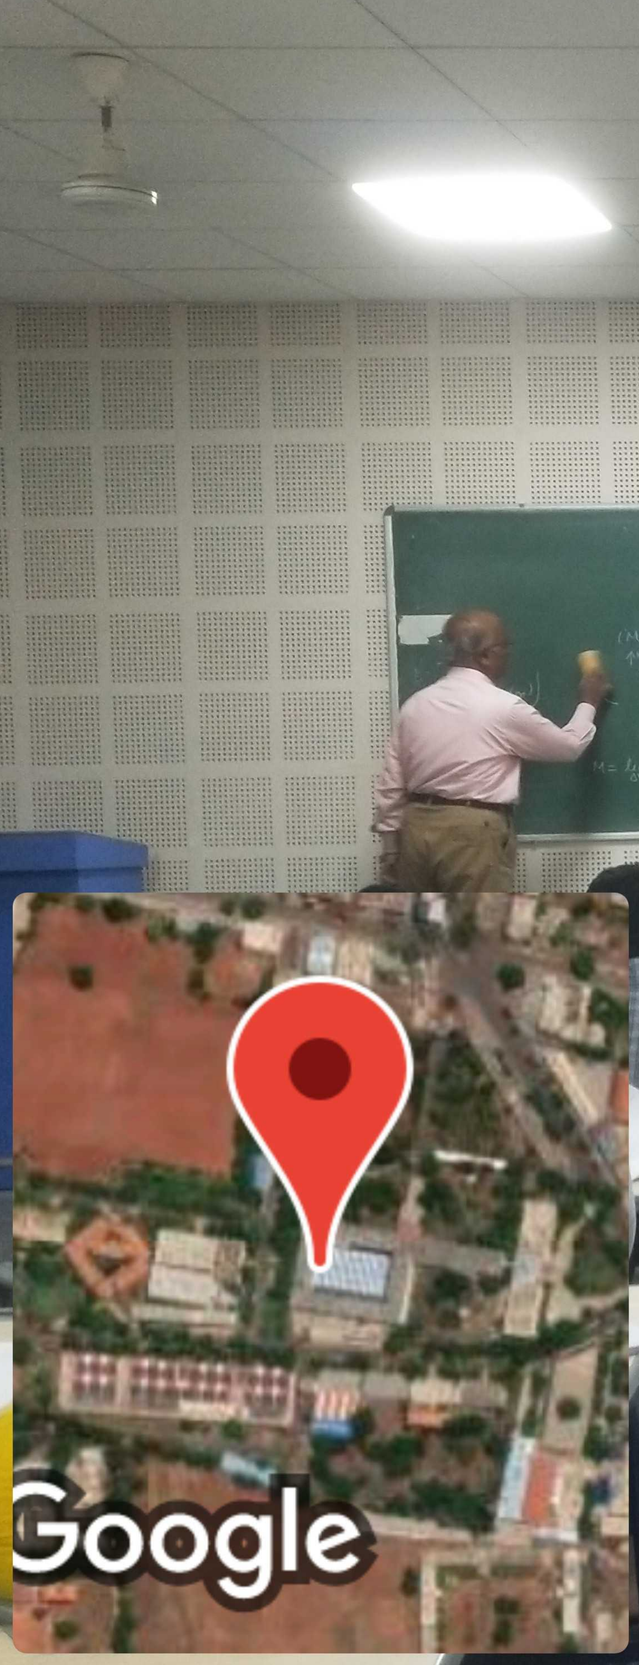

Vision

To be in the global forefront of Academic Excellence, Research and Innovation in Electrical & Electronics Engineering to influence and meet the energy, environment, industrial and societal needs.

Department of Electrical & Electronics Engineering

Mission

- To practice dynamic teaching-learning processes adapting to ongoing global technological developments in the field of Electrical and Electronics Engineering.
- To involve ourselves in national/international (industry/institute) collaborations for higher studies, research, development and innovation.
- To carryout inter-disciplinary projects, skill development activities and field visits to imbibe real life experiences in students.
- To render empathetical services to resolve energy, ecology and environmental issues.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

1. To apply the theoretical concepts like, structural dynamics, elasticity, plasticity, finite element methods, matrix methods and numerical methods in the design of structural components
2. To make student competent to analyze and design various structures like earthquake resistant structures, bridges, tall structures, folded plates and shells, pre-stressed composite structures, industrial steel structures etc.
3. The graduates will use various analytical and design tools in design of various structures and able to test the structural components in the laboratory and field
4. The graduates will involve in research and development activities in structural engineering domain and inter-disciplinary areas
5. Expected to be competent, creative and highly valued professionals in industry, academia or government

PROGRAM OUTCOMES (POs)

1. Exhibit in depth knowledge to identify and analyze the problem then formulate and use the appropriate computing and structural engineering techniques to attain its solution
2. Analyze and design structures with higher degree of proficiency
3. Use the techniques, skills, and modern engineering tools, instrumentation and software packages necessary for structural engineering profession
4. Take up the professional work in research, structural and multidisciplinary engineering domains
5. Establish themselves as proficient professional in industry and academics

Do not write on this smart board except the pens supplied with it

PROGRAMME EDUCATIONAL OBJECTIVES

1. To make student competent to analyse and design various Geotechnical structures like retaining walls, embankments and slope stability problems.
2. To train students to apply analytical knowledge for Soil improvement and stabilization for economical design of foundations.
3. To instill research culture in contemporary Geotechnical issues for continuous professional development.
4. To make students competent, creative and highly valued professionals in industry, academia or government.
5. To inculcate ethical values and societal needs and also to create ecological and commercial awareness.

PROGRAMME OUTCOMES (POs)

1. Exhibit in depth knowledge and skills in each specific disciplines of Geotechnical Engineering.
2. Demonstrate the ability to identify, formulate and solve Geotechnical Engineering problems using modern tools.
3. Analyze complex engineering problems critically and apply appropriate research methodologies for solution to real time problems.
4. Exhibit research capabilities in Geotechnical Engineering for societal changes.
5. Engage in lifelong learning independently and work on multidisciplinary areas.
