**M.Tech in Digital Communication Engineering**

**Life @ Electronics and Communication Department (M.Tech in Digital Communication Engineering)**

The department of Electronics and Communication Engineering offers M.Tech course in Digital Communication Engineering having intake of 18. Experienced faculty with Ph.D. in Signal Processing, VLSI, Micro Electro Mechanical Systems and Computer Networks are associated with the course. The students have an opportunity to acquire state of art knowledge in theory and practical aspects of digital communication engineering. Curriculum is well balanced with respect to theory and laboratories. The curriculum helps the students to be placed in industry and be successful. The course motivates the student to choose teaching career and engage in research work. Graduates from this course are very successful and working in different sectors.

The department has dedicated laboratory for M.Tech students with software's like MATLAB, QUALNET and COVENTOR-WARE. Students are free to use the laboratory and other facilities existing in the department. Students are able to take up projects and industrial training using the facilities available in the department. Students are able to publish quality papers in standard journals and conferences.
