

## SCADA for Distribution Automation Research Centre

Incharge: Dr. Suresh H. Jangamashetti

**Research Objective:** To develop Smart Microgrid for Energy Management of small load centers. To demonstrate monitoring and control of campus loads using SCADA for distribution automation.

### Major Equipment's

- **Feeder Control Unit (FCU) Module** – Built-in multi-function energy meter with display & communication port
- **SCADA Master Module** – PC hardware interface with multi-communication ports
- **Software Module** – User interface with data logging & analysis, graphical display, communication, etc.
